

SERIOUS TOOLWORKS INC

"Isn't it time you get Serious?"

Serious Toolworks delivers outstanding lathe performance...

The Super Duty SL2542 Wood Lathe - Now Available

First developed in 1999, our premium wood lathe offers an unmatched combination of engineering, finish, power, and stability.

While most wood lathes weigh 100 to 400 pounds, the Serious Wood Lathe (SL2542) weighs in at over 1580 pounds — including enough power, control, and capacity to handle any project.

Professional woodturner Mike Mahoney states, "The stability and torque of the SL2542 is amazing, this is a very impressive wood lathe!"
